FlatTrak® BY BELMONT

Introducing FlatTrak

ENGINEERED FOR SAFETY, EASE AND EFFICIENCY

For those who need seamless loading and unloading, the FlatTrak by Belmont Trailers provides a superior drop-deck design that improves safety and efficiency. Designed with advanced engineering, cutting-edge features, and real-world testing, these trailers make transporting equipment, materials, and vehicles easier, smoother, and safer than ever.

A Smooth Experience

Who doesn't love a sleek ride? Each wheel of the FlatTrak has its own independent suspension adding a nice touch of smooth to your ride. You won't look back.

Fender Clearance

Do you enjoy parking in a tight space and being forced to squeeze out to avoid scratching the door? The FlatTrak's hydraulic lift cylinders offer an increased bed height, giving your door easy clearance over the fenders.

Easy & Safe Loading

Whether you haul stump grinders, sweepers, man lifts, or compact rollers, or unload your trailers using forklifts or pallet jacks, FlatTrak will make loading easier and safer.

Toward The Future

FlatTrak imagined. That wasn't just one stage; that's our mindset. At Belmont, we love to dream up new ways to improve what we make. Our products constantly evolve. FlatTrak is no exception.

FlatTrak Comes In 3 Versions:

FlatTrak Car Hauler

FlatTrak Equipment

FlatTrak Enclosed

FRAME DESIGNS

Car Hauler Design (FTC)

Designed specifically for cars, this frame is lightweight and provides more width between the fenders.

A-Frame Design (FCH)

Designed to easily haul equipment and other heavy materials with a superior drop deck design that improves safety and efficiency.

Single Axle Design (FCH)

Well suited for smaller equipment and rental transactions.

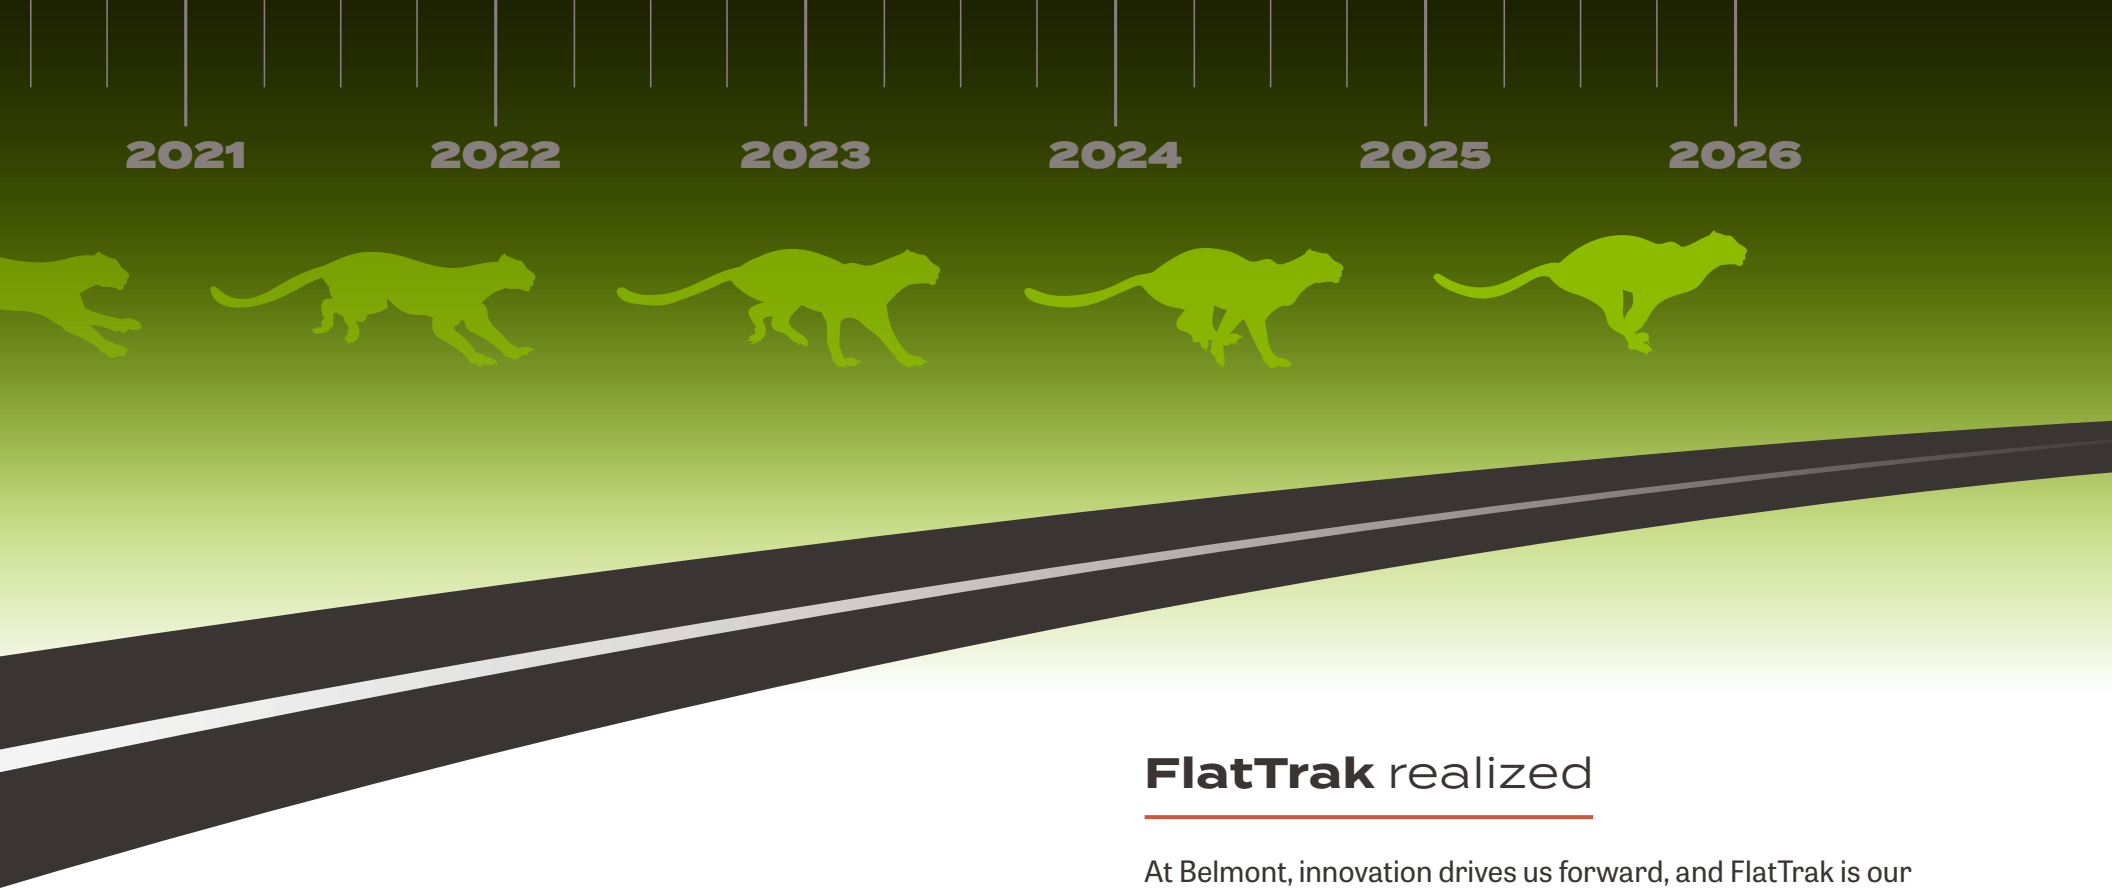
2015 2016 2017 2018 2019 2020

FlatTrak imagined

It was late 2015. A dealer tour had set our Belmont minds churning with dreams and designs of a new trailer–one that would answer the low-clearance drop-deck deficit in the trailer market.

FlatTrak emerging

When the original airbag lift system didn't succeed, we designed a new trailer two years later using a hydraulic system with a urethane suspension.



FlatTrak running

Then in 2021, a new prototype hit the test track. When it debuted at the NATDA show in Nashville, this new design captured the interest of dealers all over the country. With an all-new battery-powered hydraulics system and torsion bar suspension, the FlatTrak brings unprecedented convenience and sleek, new possibilities to low-clearance, low-grip loading.

FlatTrak realized

At Belmont, innovation drives us forward, and FlatTrak is our newest breakthrough. Discover all the ways FlatTrak can make loading easier, safer, and flat out awesome.

Testing and Warranties

We recognized that the FlatTrak was young and didn't have the benefit of long user experience.
So we submitted the FlatTrak to vigorous, independent third-party testing for design, durability, and workmanship.
Hence, the FlatTrak has many miles under its belt, likely more miles than you will cover for many years.
Our two-year structural warranty can help you enjoy your new FlatTrak while giving you the peace of mind
to know that you're covered in case something goes wrong.

Color Options

	Frame	Accent Pieces	PolyCor Skins
Standard	Charcoal	Lime Green	Polar White
Upgrade	Black	Belmont Colors: Charcoal, Black, Hunter Green, Grey, Red, Standard Yellow, Orange, Cat Yellow, Sapphire Blue, White, Sandstone	Gloss Black, Charcoal Grey, Metallic Silver
